

ADVANTAGE MARINE SERVICES

**TRUSTED BY LEADING
INDUSTRY PLAYER**

**ONE-STOP SOLUTION
PROVIDER FOR OFFSHORE
& MARINE NEEDS**

**PROVEN SOLUTIONS
WITH EXCELLENCE**

OUR MAIN SERVICES

COMMERCIAL DIVING
Expert underwater
inspection, repair, and
salvage for offshore
assets

**NON-DESTRUCTIVE
TESTING & PWHT**
Advanced testing and
heat treatment to ensure
asset integrity.

**IRATA ROPE
ACCESS SERVICES**
LGI, DROPS & other
repair inspection work.

**OFFSHORE REPAIR &
MAINTENANCE**
Re-activation, SPS and
maintenance &
refurbishment

**ENGINEERING &
STEELWORKS**
Hull Renewal, New
Fabrication, Hull repair &
BWTS

**TRADING & AUTHORIZED
DISTRIBUTIONS**
Authorized distributor of
ROVs, pipeline access tech,
and spare parts.

ABOUT US

Advantage Marine Services (Malaysia) Sdn. Bhd. (AMS) is an integrated marine and offshore solutions provider specializing in inspection, maintenance, repair and operational support for marine and offshore assets across Malaysia and the Asia-Pacific region. Established in 2015, the company delivers reliable and specialized services to the marine, oil & gas, petrochemical and power generation sectors. AMS supports offshore energy assets, drilling operations and marine infrastructure through a comprehensive portfolio of services including commercial diving and underwater services, engineered steel works, non-destructive testing (NDT), rope access services such as DROPS inspection and Lifting Gear Inspection (LGI), as well as marine salvage operations. Backed by a highly experienced and technically skilled workforce, the company operates in accordance with the highest standards of safety, quality and operational excellence, ensuring reliable service delivery in demanding marine and offshore environments. With a proven project track record and strong regional industry network, Advantage Marine Services has established itself as a trusted partner to offshore operators, drilling contractors, shipowners, petrochemical facilities, and power plant operators, delivering practical and dependable solutions that support the safe and efficient operation of marine and offshore assets.

VISION

To be a trusted global partner delivering integrated solutions with excellence and confidence.

MISSION

GLOBAL PARTNER

Develop and sustain global partnership through collaboration and long-term value creation.

TRUSTED

Empower clients by providing innovative solutions that enhance their operational performance.

EXCELLENCE

Consistently delivering operational excellence

INTEGRATED SOLUTIONS

Deliver integrated solutions that simplify complexity with professional engineering and project management.

ENVIRONMENT

Commit to the highest standards of health, safety, and environmental stewardship in all operations.

MEET OUR MANAGEMENT TEAM

Mr. Andrew Teow | Managing Director

Mr. Andrew Teow holds both a Bachelor's and Master's degree in Petroleum Engineering from Universiti Teknologi Malaysia (UTM), Johor Bahru. He joined Advantage Marine Services (AMS) in April 2016, bringing over 25 years of distinguished experience in the global oil and gas industry.

Prior to joining AMS, Andrew spent 15 years with a leading global drilling contractor, where he advanced to the role of Drilling Superintendent, overseeing ultra-deepwater drilling operations, also successfully led numerous multi-million-dollar projects across Southeast Asia, earning recognition for his strategic leadership, operational discipline, and strong industry partnerships.

Under Andrew's leadership, AMS has evolved from a specialized commercial diving contractor focused on IRM (Inspection, Repair and Maintenance) into a fully integrated marine and offshore solutions provider, delivering services that support offshore energy assets, drilling operations, marine infrastructure, subsea intervention, and asset integrity management. His philosophy is to deliver safe, reliable and high-quality integrated solutions with excellence and confidence to meet and exceed our customers' expectations.

Mr. Victor Wong | Director

A 1985 graduate with a Degree in Business Administration, Mr. Victor Wong initially honed his expertise in the financial industry of Singapore, where he spent a decade building a strong foundation. In 2002, he transitioned into the marine sector, where he has since excelled in various management roles.

Mr. Wong played a pivotal role in the growth and transformation of a prominent marine company, contributing significantly to its inception and subsequent evolution from a fledgling startup to a thriving enterprise with over 100 dedicated employees. Under his leadership, the company has embraced a process-driven approach, successfully integrating systematic practices while upholding the essential industrial standards and values.

Victor's visionary leadership has been a driving force behind the company's sustained success and growth.

Mr. Dean Chapman | Operation Director

Mr. Chapman, a seasoned oil and gas professional with over 40 years of experience since 1983, has progressed from operational roles to Rig Management and, since 2007, has held key supervisory and leadership positions including Site/Construction Manager, Project Manager, Operations Manager, COO, and CTO—bringing a strong international background in drilling operations, brownfield and greenfield projects, subsea engineering, hazardous materials handling, system design, and fabrication, with a proven track record from FEED and detailed design through to offshore construction and commissioning.

ROAD MAP

• **2026**

- In Progress

• **2025**

- Maintenance and Refurbishment of HAKURYU 16 at Johor port
- PVD III : Offshore Maintenance and Inspection service (SPS)

• **2024**

- 1st SPS for Jack up rig at Labuan Completed
- Organization strength surpassed 100 nos. head count
- Company expanded to perform services in Japan, Australia, Indonesia, Brunei

• **2023**

- Completed BWTS installation for rigged & vessels (Pos Logistic 1)
- Special Periodic Survey (SPS) & System Integration Testing Hakuryu 11
- FSU Steel Renewal Underwater Using Cofferdam
- SBM Hose Change
- Major MEGA Turn Around Shell, HRC Package 1 Port Dickson, Negeri Sembilan

• **2022**

- Completed first accommodation barge salvage job
- Commenced Advanced NDT Division
- Achieved Atomic Energy License Board (AELB)
- Completed vessel surveying job
- Completed BWTS installation for rigged & vessels (Pos Logistic 1)

• **2021**

- Received Sin Chew Business Award, SME Categories
- Commenced IMCA Certification for Diving
- Completed MOPU Sepat decommissioning work
- Completed major SBM inspection work

• **2020**

- Started NDT and Rope Access Division.
- Received Golden Bull 2020 awards in SME category
- Obtained ROV Inspection Certification from 3 Major Classes

• **2019**

- Obtained BV Certified Integrated Management System
- Received CIDB grade 7 status
- Acquired 2 diving companies in Malaysia, commence
- Commercial diving operation outside Malaysia
- Completed salvage job for two barges and anchor recovery

• **2018**

- Obtained another 3 IACS Certifications for diving
- Total 9 IACS class in place
- Secured frame agreements with major rig owners for survey & inspection

• **2017**

- Approved 5 more Classes for Diving Services
- Commenced Integrated Management System for ISO Certification

• **2016**

- Obtained First ABS Class for Diving Services
- Started Steel Fabrication Division

• **2015**

- First diving operation started in the Marine Industry

OFFSHORE MAINTENANCE AND INSPECTION SERVICE (SPS)

- Load Testing (NDT)
- Tank Cleaning & Disposal
- Accommodation Upgrading Works
- Blasting & Painting
- Anode Replacement
- Testing & Commissioning
- Electrical & Mechanical Works
- Steel Related - Engineering, Steel Replacement, HP Valves Replacement & Etc.
- LGI / DROPS / PRV and Gauges Recertification Works / Ex- Survey
- Electrical and Mechanical Related Works
- Etc.

COMMERCIAL DIVING

- Hull Cleaning & Propeller Polishing – Performed with brush-kart and hydraulic power-pack polisher for efficiency, cost and time saving.
- In-Water Class Surveys (IWS)
- UWILDS - Including rudder pintle clearances and tail shaft wear-down measurements and, Special Survey
- Underwater Hull Repairs – Specialized cofferdam repairs
- Underwater salvage works.
- Comprehensive Maintenance – Full range of underwater inspection and repair services (Jack-Up Rigs, FSU, FPSO and submersible.
- SBM Inspection & Maintenance – Ensuring safe, reliable, and continuous inshore and offshore operations.
- Jetty line repair, sterntube replacement & thruster change out.
- Jetty / wharf inspection and maintenance.
- Underwater NDT (UT, CP, MPI & Eddy Current).
- Provide recognized IMCA diving team.

ENGINEERING STEELWORK

- Engineering support inclusive of site survey design, Calculation, Analysis, PE Endorsement.
- Workshop Steel Fabrication, Site Installation & In-Site Repair (Cantilever Platform, Boom Rest, Crane Boom, Cribbage, BOP Diverter Control Line, Shipping Cradles, Jack Up Deep Well, Etc.)
- Piping Replacement - Carbon Steel, Stainless Steel, Copper Nickle, High Pressure Alloy, FRP, PDC, HDPE, etc.
- Modification and Repair Work - Deck Repair, Tank Repair, Structure Engineering Strengthening, Life Boat repair or new fabrication, Jack Up Leg Extension, Jack Up Leg Guide Replacement, Anode Replacement, etc.
- Ballast Water Treatment System Turnkey Retrofitting.
- Exhaust Gas Scrubber System Installation, Repair and Maintenance.
- Painting Works - High Pressure Water Jetting (HPWJ), Painting Works, Corrosion Preventive Coating Application, etc.
- Accommodation Works - Accommodation Refurbishment, Ceiling Work, Flooring Works, Insulation Works, Paneling Works, etc.

IRATA ROPE ACCESS

- Visual Inspection (General & Close Visual)
- NDT via Rope Access (MPI, UT, DPI, ECI, etc.)
- DROPS Survey Inspection
- Derrick Inspection
- Piping and Pressure Vessel Inspection
- Thickness Gauging
- Load Monitoring / Load testing
- Lifting Gear Inspection (LGI) Derrick Bolt Change-Out Rigging Installation or Removal Blasting and Painting
- Topside Inspection (UWILD) Welding and Fitting via Rope Access Vessel Name Change / Branding Helideck Inspections
- Installation of Equipment at Height Cable Routing / puller
- Deployment of Automated Inspection Equipment
- Confined Space Entry via Rope Access Rental of Rope Access Equipment EMAG Inspection (Wire Rope)

NON-DESTRUCTIVE TESTING CONVENTIONAL & ADVANCED METHODS

CONVENTIONAL NDT

- Visual Testing Radiography Testing
- Magnetic Testing (Wet, Dry, Fluorescent) Penetrant Testing
- Ultrasonic Testing
- Ultrasonic Testing Thickness Gauging Ferrite Test
- Hardness Test (UCI & LEEBS) Eddy Current Testing
- Surface Vacuum Box/Tube
- Holiday Test (Low KV or High KV)

ADVANCED NDT

- Phased Array Ultrasonic Testing (PAUT) (Big bore, Small bore & Stainless Steel)
- C-scan (Corrosion Mapping)
- Time-of-Flight Diffraction (TOFD)
- Digital Radiography (DR)
- Computed Radiography (CR)
- Pulsed Eddy Current (PEC)
- Infrared Thermography (IR)
- Acoustic Emission Testing (AET)
- Eddy Current Testing (ECT) for Tubing
- Borescope inspection
- Positive Material Identification (PMI LIBS/XRF)
- Alternating Current Field Measurement (ACFM)
- Internal Rotating Inspection System (IRIS)
- Remote Field Testing (RFET)

HEAT TREATMENT

- Post Weld heat Treatment
- Pre Heat

MATERIAL

- Positive Material identification (XRF & LIBS)
- Replica Testing

TRADING & OTHERS

- Accommodation upgrading / Carpentry work
- High-Pressure Water Blasting and Painting (Rope Access and Groundwork) HVAC
- Control Solution / Automation (Calibration for all sensors and gauges - such as fire, gas, wind speed, humidity, pressure, etc)
- Testing and commissioning of machinery and another newly installed facility such as lifeboats, HVAC
- Jetty Construction activities by diver
- Tank Cleaning
- Duct Cleaning
- Accommodation upgrading work
- Involved in all stages of the supply chain from development and delivery purchasing of raw materials to delivery
- Processing, distribution, and sale, providing services with high added-value
- Rental of fenders, equipment and machinery

AUTHORISED DISTRIBUTORS OVOLIFTS

Authorized Distributor ship in South East Asia. It has an unique and patented technology developed for providing safe access at multiple points for in-service pipeline inspection and maintenance to defer asset replacement and costly shutdowns.

ENGINEERING SERVICES

LIFT PLANNING

A Lift Plan defines lifting configurations and lifting curves.

It includes line weight calculations to ensure loads remain within the operating limits of the lifting equipment and is used for workflow management to coordinate site activities such as lifting, inspection and repairs.

PIPE STRESS ANALYSIS

Line lifting imposes a deflection which introduces stresses into the piping system that are greater than the normal operating load case or resting case. A pipe stress analysis is critical for ensuring the proposed lift heights won't introduce stresses that are above the allowable code limits.

PROJECT MANAGEMENT

Our years of experience supporting contractors with on-stream line lifting has provided us with a wealth of knowledge and experience that has positioned us as industry experts in the field of engineered line lifting.

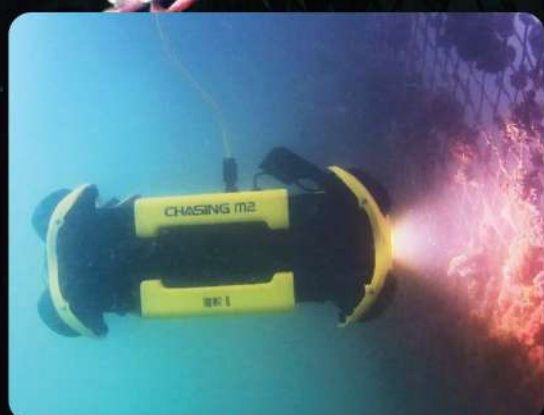

AUTHORISED DISTRIBUTORS CHASING M2 ROV

Official distributor of Chasing M2 ROV and its corresponding attachments.

Carry out in house repair and can arrange for supply of OEM spares for repair.
